**Evidence Based:** The Science of Reading (SoR) is a comprehensive body of research that encompasses years of scientific knowledge and has evolved from a wide span of research designs, experimental methods, participants, and statistical analyses. This conclusive, empirically supported research provides the information needed to gain a deeper understanding of how students learn to read, what skills are involved, how they work together, and which parts of the brain are responsible for reading development. Identification of evidence-based best practice approaches for teaching foundational literacy skills called Structured Literacy come from this research. SoR offers evidence backed by science to confirm that there is one right way to teach reading and provides vital information to drive the MSLE approach to instruction for all learners. The SoR helps to clarify the cognitive processes that are essential for reading proficiency and has debunked various methods used to teach reading that are not based on scientific evidence. Studies have demonstrated the effectiveness of intensive phonemic awareness and phonic decoding training and opportunities for repeated practice with reading controlled text. Intervention in these skills leads to efficient orthographic mapping with the highest degree of success. Intervention research estimates that the use of evidence-based prevention and intervention approaches in literacy could decrease the number of below-level readers from 30% to 5% (IMSE Jornal, Ordetx).

The Orton-Gillingham Approach is an evidence-based Structured Literacy approach that uses research from the SoR and incorporates recommended multi-sensory instructional techniques (MSLE). "The essential instructional practices that characterize the Orton-Gillingham Approach are derived from two sources: first from a body of time-tested knowledge and practice that has been validated over the past 80 years, and second from scientific evidence about how individuals learn to read and write" (Academy of Orton-Gillingham Practitioners and Educators).

**Alignment:** Evidence-based reading instruction is aligned to Structured Literacy through the SoR using the Orton-Gillingham Approach to reading instruction. The proven strategies align literacy instruction with the SoR and contain instruction in phonology and phonological awareness, sound-symbol association, syllable instruction, morphology, syntax, and semantics (comprehension). The principles of this evidence-based reading instruction are simultaneous multisensory (VAKT), systematic, cumulative, direct, diagnostic, and synthetic and analytic.

**Components of Structured Literacy Instruction:** The SoR identifies five essential components that Structured Literacy incorporates: Phonemic Awareness, Phonics, Fluency, Vocabulary, and Comprehension. The Orton-Gillingham Approach incorporates recommended multi-sensory instructional techniques (MSLE) found in Structured Literacy. Students are provided repeated opportunities with decodable text that contain the phonetic elements needed for code-emphasis. Structured Literacy supports instruction that is explicit, sequential, systematic,

prescriptive, diagnostic, and cumulative. Instruction is assessment-driven and requires continued progress monitoring to measure outcomes and guide differentiation.

#### In Attendance:

#### **Agenda Items Discussed:**

#### Ms. Walters

Ms. Walters shared with the committee members the Cornerstone Counseling and Consulting Agreement is a benefit and no cost to us.

Ms. Walters discussed the IXL Learning Agreement for the High School. The Jr. High currently uses IXL Learning for Math, Reading and Science and is paid for out of Title I Funds. The High School will use IXL for Math and Reading and will pay for this agreement out of their project 515 School Improvement Funds.

Ms. Walters also discussed the Stop, Go and Tell Agreement. This is another agreement that is no cost to the district. We have one elementary counselor who is certified to present this program but we will need a certified presenter from this company to present the program to the other two elementary sites. The current agreement is in draft form as we have not received a new agreement to date as we have been having a difficult time receiving it from Bethesda. We may have to table this agreement and move it to December's agenda.

### Mr. Hancock

Mr. Hancock gave a report of the non-remediation students who graduated in 2020-2021 compared to the state average. The state does not take into account private colleges or vocational technology centers, only public colleges.

Mr. Hancock also discussed a proposed contract with an instructional coach for GUES. Laura Carter is a reading specialist that will work with our teachers. She will help the teachers learn and implement many different strategies. The cost for this instructional coach will be paid for out of project 515 School Improvement Funds.

#### **Dr. Simpson**

Dr. Simpson shared with the committee district updates.
